simply doing more

More than the latest technology.
Long-lasting satisfaction.

Dental implant therapy is today's treatment of choice

Your decision to replace missing teeth with dental implants is an excellent investment in your oral health and appearance. They can improve your health-related quality of life and are cost-effective in the long run.

We are able to cover all your needs

When we talk about healthy teeth, it is not only function that matters. They are also an essential part of your physical appearance – accordingly, you expect an optimal esthetic and natural outcome when it comes to dental restorations. Straumann offers a wide range of high quality tooth replacement solutions to improve your quality of life.

Inspired by nature

A dental implant is a small post-like part which is inserted in the jaw bone in place of the missing tooth root. With the Straumann® PURE Ceramic Implant, you have a tooth-colored and metal-free alternative which acts and looks like a natural and healthy tooth.

More than an implant.

A new tooth.

For a natural smile

The Straumann® PURE Ceramic Implant is made of high-strength ceramic and designed to achieve highest functional and esthetic demands. Since it has the color of a natural tooth, the implant will not shimmer through, even in cases of thin or recessed gingiva.

Proven Straumann properties

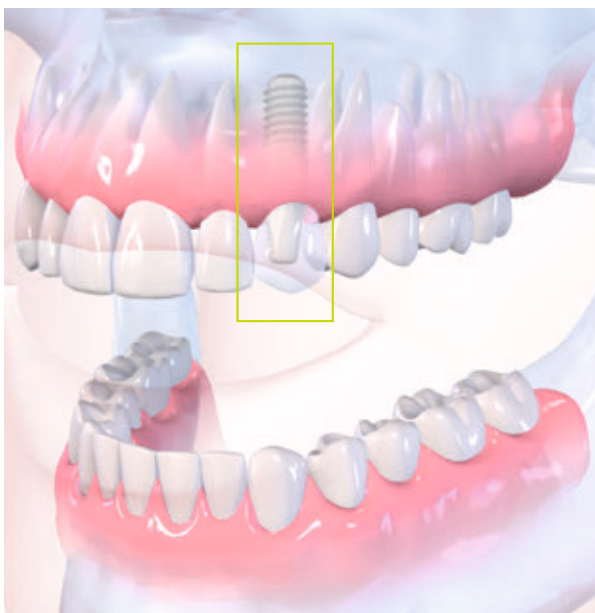

This implant offers all the benefits that characterizes a member of the renowned Straumann® Dental Implant System: reliability, high strength, excellent integration in the bone and properties that enable for an excellent outcome both functional and esthetic.

Researched and manufactured according to the highest standards

The Straumann® PURE Ceramic Implant underwent rigorous scientific research before its introduction to the market. Furthermore, every single Straumann® PURE Ceramic Implant is tested mechanically before it is delivered to the dentist. These are the standards you can expect from one of the most renowned and experienced companies in the field of dental implantology.

With the Straumann® PURE Ceramic Implant you receive an implant that

- enables for highly esthetic restorations thanks to its tooth-like color
- offers a metal-free alternative with excellent biocompatibility
- is mechanically tested before insertion and backed by scientific evidence
